National Infrastructures for Radiation Safety: Towards Effective and Sustainable Systems Proceedings of an International Conference in Rabat, Morocco, 1-5 September 2003

Proceedings Series

This conference reviewed the overall situation with respect to the development of radiation safety and security infrastructures both in IAEA Member States and in countries that are not IAEA Member States. It highlighted the need for complete and effective radiation safety and security infrastructures that are sustainable. The conference findings and recommendations are included in these proceedings, along with the keynote speeches, rapporteurs' summaries of contributed papers and the discussions. The contributed papers and oral presentations are available on a CD that is attached to the back of this volume.

STI/PUB/1193, 449 pp.; 14 figures; 2004, ISBN 92-0-105404-1, English. 120.00 Euro. Date of Issue: 17 September 2004.

Subject Classification: 0609 - Radiation protection; 0614 - Legal and governmental aspects.
Responsible Officer: Mr. Khammar Mrabit, NSRW

Publicações Recebidas em Setembro - IAEA

<http://www.iaea.org/Publications/Standards/index.html>

Reference Data Series No. 1

This annual publication contains estimates of energy, electricity and nuclear power trends up to the year 2030, using a variety of sources, such as the IAEA's Power Reactor Information System and data prepared by the United Nations.

IAEA-RDS-1/24, 53 pp.; 10 figures; 2004, ISBN 92-0-109004-8, English. 9.00 Euro.

Subject Classification: 0701 - Nuclear power planning and economics.

Regulations for the Safe Transport of Radioactive Material 1996 Edition (As Amended 2003) Safety Requirements

Safety Standards Series No. TS-R-1, 2004, English

Management of Waste Containing Tritium and Carbon-14

Technical Reports Series No. 421

This report reviews and analyses experience in the application of different organizational and technological approaches to the management of waste containing C-14 and tritium, and reviews the different sources of such waste and the characteristics important in the selection of appropriate methods for its processing, storage, disposal and release.

STI/DOC/O10/421, 109 pp.; 8 figures; 2004, ISBN 92-0-114303-6, English.

Subject Classification: 0611 - Radioactive waste management; 0803 - Spent fuel management; 0804 - Waste management.

Responsible Officer: Mr. Valeri Efremenkov, NEFW

Application of the Concepts of Exclusion, Exemption and Clearance Safety Guide

Safety Standards Series No. RS-G-1.7

This Safety Guide provides guidance on the application of the concepts of exclusion, exemption and clearance as established in the "International Basic Safety Standards for Protection against Ionizing Radiation and for the Safety of Radiation Sources". The Safety Guide includes specific values for activity concentrations for both radionuclides of natural origin and those of artificial origin that may be used for bulk amounts of material for the purposes of applying the concepts of exclusion and exemption.

STI/PUB/1202, 29 pp.; 0 figures; 2004, ISBN 92-0-109404-3, English. 16.00 Euro. Date of Issue: 2 September 2004.

Subject Classification: 0609 - Radiation protection; 1300 - Environment.
Responsible Officer: Mr. Dennis William Reisenweaver, NSRW

Appraisal for France of the Safety of the Transport of Radioactive Material

IAEA Safety Standards Applications - TranSAS-6

The IAEA has the specific statutory function within the United Nations system of establishing standards of safety for the protection of health against exposure to ionizing radiation. As part of this mandate, the IAEA has issued Regulations for the Safe Transport of Radioactive Material, and has also established the Transport Safety Appraisal Service (TranSAS) to carry out, at the request of States, appraisals of the implementation of these regulations. The IAEA carried out such an appraisal in France from 27 March to 8 April 2004. The appraisal addressed all relevant transport activities in France, both national and international, for all modes of transport, with special emphasis on the maritime transport and air transport of radioactive material. This report summarizes the findings of the 13 independent experts who participated in the appraisal.

STI/PUB/1208, 120 pp.; 17 figures; 2004, ISBN 92-0-111204-1.

Subject Classification: 0606 - Transport of radioactive material.
Responsible Officer: Mr. Gerardus Johannes Dicke, NSRW
